PROFESSIONAL SUMMARY

Engineer with 4+ years designing, building and shipping distributed, cloud-native systems at enterprise scale. Owns multi-tenant platforms across 300 production clusters at 99.9% uptime, from API design through GitOps delivery to on-call ownership, and has learned first-hand which edge cases only surface once something is live. Uses AI tools daily as part of everyday engineering work, with a solid grounding in what makes enterprise software hard: multi-tenancy, security governance, auditability and scale.

TECHNICAL SKILLS

AI Coding Tools: Claude Code, Cursor, GitHub Copilot, prompt engineering

Cloud & Containers: Kubernetes (AKS, OpenShift, on-prem), Docker, Helm, Microsoft Azure

APIs & Integration: GraphQL & REST API design, ServiceNow, Jira, event-driven systems

Infrastructure as Code & CI/CD: Terraform, Flux CD, Ansible, Jenkins, GitHub Actions, Concourse

Distributed Systems: Kafka, Elasticsearch, Redis, multi-tenant platform design

Observability & Security: Prometheus, Grafana, Dynatrace, Kibana, Incident Response, Aqua, DAST

Languages: Python, Go, Java, JavaScript, Groovy, Bash, C#, TypeScript

WORK EXPERIENCE

Senior Cloud Engineer

June 2024 - July 2026

Royal Bank of Canada, Toronto, Canada

- Turned an ambiguous, manual provisioning problem into GraphQL APIs that automate Elasticsearch cluster creation and lifecycle management across a 300-cluster, multi-tenant Kubernetes platform at 99.9% uptime, integrating ServiceNow and Jira to cut provisioning turnaround from days to under 2 hours and ticket volume by 30%.
- Built CI/CD pipelines with Flux CD and Ansible, cutting environment provisioning and upgrade time by 60%.
- Automated disaster recovery (DR) game day exercise steps across core data platforms, making failover testing smoother and more consistent.
- Owned on-call incident response using Prometheus and Grafana dashboards, cutting mean time to resolution (MTTR) by 30%.
- Automated security scanning (Aqua, DAST) across multi-tenant environments, cutting vulnerability remediation time by 20%.
- Partnered with application teams and SREs on developer self-service tooling, cutting manual operational overhead by 8-10 hours per week.

DevOps Engineer

January 2023 - June 2024

Royal Bank of Canada, Toronto, Canada

- Led migration of Logstash streaming workloads from PCF to OpenShift 4 for 20+ services, cutting deployment failures by 30%.
- Onboarded 20+ legacy and mainframe-backed applications onto RBC's Helios CI/CD platform, cutting release cycle time by 20%.
- Automated Azure Service Principal rotation, Apigee token generation and A/B deployments, eliminating 5-7 hours of manual effort per cycle.
- Added new pipeline features and configuration options to support varying deployment needs across application teams, extending the platform beyond a one-size-fits-all setup.
- Served as primary escalation point for CI/CD issues across 20+ teams and mentored developers on pipeline usage, cutting L2 tickets by 30%.

Technical Systems Analyst

September 2022 - December 2022

Royal Bank of Canada, Toronto, Canada

- Automated Windows service inventory and endpoint health validation across 200+ endpoints, cutting manual audit effort by 15+ hours per month.
- Implemented Kibana and Dynatrace monitoring for critical infrastructure, cutting operational response time by 20%.

Tech Support Associate (Part-time)

October 2021 - December 2022

Asha IT Solutions Ltd, Toronto, Canada

- Helped clients of Peloton and Intuit troubleshoot and resolve technical issues with their products over phone and chat.
- Documented recurring issues and resolutions to help build out the team's internal knowledge base.

Virtual Process Associate

October 2019 - January 2020

Amazon, Hyderabad, India

- Resolved order shipment issues for customers, coordinating with internal teams to track packages and correct delivery problems.
- Handled a high volume of order-related queries daily while meeting accuracy and turnaround targets.

EDUCATION

Post-Graduate Diploma, Computer Software and Database Development

May 2021 - January 2023

Lambton College, Toronto, Canada

Bachelor of Technology, Computer Science and Engineering

August 2015 - June 2019

Jawaharlal Nehru Technological University of Hyderabad, India
